**ADD/ADHD Cardiovascular Screening**

Screening should be completed within 4 weeks before initiation of stimulant medication.

To Patient: Complete answers to these 6 questions:

Do you have a history of a known heart condition?

---

---

---

Do you have any history of palpitations (fast or irregular heart beat)?

---

---

---

Do you have a history of passing out?

---

---

---

Do you have any history of seizures?

---

---

---

Do you have any family history of sudden death in children or adults?

---

---

---

Do you have any family history of Wolff-Parkinson-White syndrome, hypertrophic cardiomyopathy, or familial arrhythmia or long QT syndrome?

---

---

---

*I agree to notify my prescribing physician if responses to these questions change at any time, since any of these issues may increase my risk of sudden death.*
